

## DIRECTIONS

**\*ASK AN ADULT FOR HELP - THIS PROJECT REQUIRES AN OVEN AND PRODUCES SMALL PLASTIC PIECES (CHOKING HAZARD)**

1. Print this sheet on the rough side of a shrinkable plastic sheet made for inkjet printers (such as Shrinky Dinks®).
2. Cut out the charms (use a hole punch for the holes).
3. Preheat an oven or toaster oven to 300 degrees and place the charms ink side up on a baking tray lined with craft paper or a brown paper bag.
4. After 5 minutes, take the tray out of the oven. The charms will harden and cool off in about 10 seconds.
5. After the charms have cooled, paint the ink side with clear nail polish to preserve the ink and make it shiny.
